MiniPub

- MiniPub
- VDT
- Console
- On-Line Interface
- Disk
- Streamer Tape

OVERVIEW

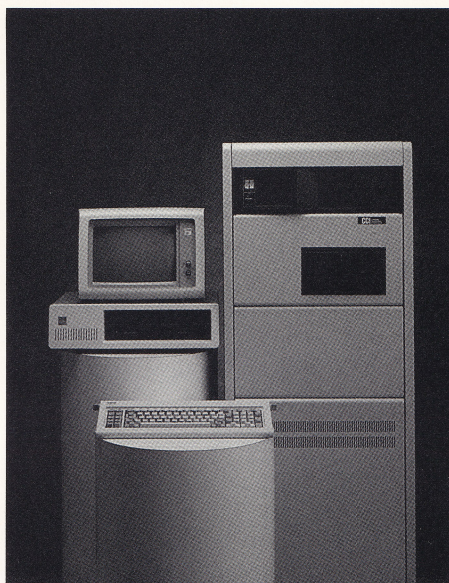

The MiniPub system has been designed for the small commercial publisher. The hardware and software is specially configured to facilitate magazine and book work to give the user the broadest range of publishing oriented aids available at one low price. The system comes standard with three 400 input and text editing stations, 34 megabytes of on-line storage, magnetic tape streamer for archive and backup, 8 port multiplexor for future expansion, plus an on-line typesetter driver program.

APPLICATION OVERVIEW

The MiniPub is designed to be applied to a broad range of applications. XY coordinates make magazine and tabloid makeup easy; PageBuilder provides a great deal of pagination flexibility; and BookIV is specially suited for high volume pagination, while TechPage satisfies the need for integrating graphics with text.

Commercial: An excellent fit for the commercial shop that performs book pagination or loose leaf pagination. The MiniPub system is tailored to meet the needs of the publications market place. The inherent flexibility of the CCI system makes it ideal for today and tomorrow.

Inplant: The MiniPub system is suited for production of in-plant documentation, newsletters and magazines—an affordable way to produce high quality books and manuals.

FEATURES and BENEFITS

Economical price

So the small publisher can take advantage of big system features.

Complete set of programs

Enables you to handle pagination needs from magazine to book.

XY coordinate system

Permits complex makeup in a fraction of the time.

PageBuilder pagination module

A comprehensive tool for simple paging and non-standard document processing and makeup.

MiniBook pagination module

It provides an automated and sophisticated tool for pagination that includes the ability to set running heads, feet and folios, place graphic windows, vertically justifies using carding and feathering and provides a completely automated menu system for the creation of book templates without the need for complex composition coding.

Turnkey system

All the tools needed for success in the publications arena are delivered standard, including training; therefore you will quickly reach return on investment, without additional software or hardware costs.

Comes equipped with two-way telecommunications

Whether you wish to talk to a word-processor, mainframe, or CCI Editor, the interface is installed and ready to go!

SPECIAL CONSIDERATIONS: Systems that support it: N/A. Memory consideration: 384KB. Environmental: Office. Modem Type: Bell compatible. MUX Channels: 8 ports. Communication Protocol: TypeLink or TyComNet.
